After many years in the fitness industry I am looking to refocus my career path towards web development. I am in the process of completing a web development certification through University of California at Irvine. I am looking for a full-time job as a junior/entry-level full-stack web developer and to improve my skills as a programmer.

TECHNICAL SKILLS

HTML, CSS, JavaScript, Web API, Third-Party API, Server-side API, NodeJS, MySQL, MongoDB, jQuery
Will learn React. Expected completion date is August 28, 2021

WORK EXPERIENCE

Laguna Woods Fitness Centers

California, Laguna Woods
Fitness Coordinator/Personal Trainer, September 2011 - Present

- Successfully implemented a noon and evening circuit class and had 70 - 75% participate retention rate
- Helped improve team's ability use computer programs
- Successfully improved scheduling program
- Coordinated a yearly 2 week long fitness competition

SKILLS

- Fluent in Spanish – written and verbal communication
- Leadership: personnel management and team building, organized and proactive with a self-starter work ethic and excellent problem solving and troubleshooting abilities
- Microsoft Office, PowerPoint, Word, and Excel
- Capable of providing general administrative support

PROJECTS

GitGoin | <https://github.com/rodablanco/GitGoin> | <https://rodablanco.github.io/GitGoin/>

- Summary: Geared to scale down the Bitcoin world for a beginner. Brings in top 7 and 100 trading coins. Also, shows the latest news and can search news specific to a coin.
- Role: I worked on connecting the top 100 coin API, and styling the cards for each coin.
- Tools: HTML, CSS, JavaScript, Bootstrap, API

Pet Connect | <https://github.com/rodablanco/project-2-pet-connect> | <https://project-2-pet-connect.herokuapp.com/>

- Summary: Pet Connect is a social media application that is designed to connect pet owners. Users can create posts to plan dog walks with others, get potty training lessons, provide product information, and ask questions from other pet owners. If they're lucky, they can even find soulmates for their pets.
- Role: I contributed to the controllers and view folders and help with JavaScript throughout the application
- Tools: HTML, CSS, JavaScript, Bootswatch, Heroku, Insomnia, MySQL Workbench, Node, Bcrypt, Dotenv, Express, Express-Handlebars, Express-Session, Mysql2, Nodemailer

Tech Blog | <https://github.com/rodablanco/tech-blog> | <https://tech-blog24.herokuapp.com/>

- Summary: Tech Blog is a forum where developers can seek assistance from other developers.
- Role: Primary coder.
- Tools: HTML, CSS, JavaScript, Bootswatch, Heroku, MySQL Workbench, Node, Bcrypt, Dotenv, Express, Express-Handlebars, Express-Session, Mysql2
